Description:
USP® 45 Mil SP NR Flashing is designed for use as a flexible flashing that conforms to detailed areas or at locations where a reinforced flashing membrane will not conform as needed. The USP® 45 Mil SP NR Flashing is manufactured from the same USP® EV-PLUS thermoplastic technology combined with Du Pont’s premium Elvaloy® ketone-ethylene-ester (KEE) and is non-reinforced. The USP® 45 Mil SP NR Flashing requires a 2" minimum weld using hot-air welding procedures only.

Use: Membrane is flexible so that it conforms to detailed areas or areas where a reinforced flashing membrane will not conform as needed. Used in conjunction with USP® EV-PLUS, USP® FB EV-PLUS, and USP® PVC Thermoplastic Single Ply membranes. Has the same nature as USP® EV-PLUS Thermoplastic which exhibits excellent chemical, ozone and UV exposure and increased cold weather flexibility to -40°F.

Application Guidelines: USP® 45 Mil SP NR Flashing is applied using hot air welding procedures.

Product Data: USP® 45 Mil SP NR Flashing (typical)
Color: White
Thickness: .045"
Dimensions: 24” x 100’
Weight: 65 lbs/roll
Packaging: 15 rolls per pallet
